Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. It is noted that this application claims subject matter disclosed in prior Application No. 10/292,470, filed November 13, 2002. A reference to the prior application has been provided in an application data sheet (37 CFR 1.76), however, the current status of the nonprovisional parent application referenced must be updated.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 42-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 42 and 43 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are between the sealing surface and the closure member. In the embodiment being claimed, Figure 5, a closure member 34 is coupled to the widened portion 33 of the hollow piston 31. However, the "sealing surface" recited in lines 10-14, is located in the closure member and is structurally part of the closure member, see page 8, lines 1-3, where it defines the base of the depression forming the sealing surface. The recitation

of the "closure member" paragraph should be inserted before the "sealing surface" paragraph and the relationship between the closure member and sealing surface defined. Language such as --a sealing surface located in the closure member--, should be used to replace the phrase "a sealing surface".

In claim 43, the structural cooperative relationship between the sealing surface and the depression is omitted and not properly defined. Language such as --a base of the depression forming the sealing surface-- should be inserted in the claim.

Allowable Subject Matter

4. Claims 42-45 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tempelman, Weston and Batteggazzore show various types of piston type devices for pressurizing fluid.
